Checkmate Waste Management – Environmental Policy Statement

Issued: October 2025 | Next review: October 2026

Checkmate Waste Management is committed to leadership in environmental stewardship within the UK waste and resource management sector.

Our Commitments

- Achieve zero-to-landfill wherever technically and economically practicable across all collections.
- Prioritise the waste hierarchy: prevent, reuse, refurbish, recycle, recover energy – only then dispose.
- Actively promote the circular economy by matching reusable items and materials with British reuse organisations and manufacturers.
- Continually measure, report and reduce the carbon footprint of our operations and those of our supply chain.
- Please be sure to comply with all current and forthcoming UK environmental legislation and exceed requirements where possible.
- Select only British-owned recycling and recovery partners that share our environmental values and can evidence high diversion performance.

All employees and partners are required to operate in accordance with this policy.

Signed: A O'Sullivan

Managing Director, Checkmate Waste Management
